

Quantile - Quantile (Q-Q) Plot

x. v $X : x_1, x_2, x_3, \dots, x_{500}$

Simple
Graphical
Method

(Q) IS X Gaussian Distributed? \rightarrow Q-Q Plot

\rightarrow Statistical
Testing
(KS Test, AD Test)

what is Q-Q Plot

How to plot Q-Q Plot

How to read Q-Q Plot

Step 1 $x_1, x_2, x_3, \dots, x_{500} \rightarrow x_i$

we sort x_i 's and compute percentiles

$x'_1, x'_2, x'_3, \dots, x'_{500}$

↓ sorting (asc)

$x'_5, x'_{10}, x'_{15}, \dots, x'_{500}$

↓ Percentiles

1 2 3 100

↓ \rightarrow 18th percentile value of x_i 's

$x^{(1)} x^{(2)} x^{(3)} \dots x^{(500)}$

Step 2 : $x.v \ y \sim N(0,1) \rightarrow$ Std Normal Distribution

$y_1, y_2, y_3, \dots, y_{1000} \rightarrow$ 1000 random obs. from Std. N.D

\downarrow sort (asc.)

$y'_1, y'_2, y'_3, \dots, y'_{1000}$

\downarrow percentiles

$y^{(1)}, y^{(2)}, y^{(3)}, \dots, y^{(100)}$

Step 3: Plot 8-8 plot using

→ 100 such pairs

$x^{(1)}, x^{(2)}, x^{(3)}, \dots, x^{(100)}$
 $y^{(1)}, y^{(2)}, y^{(3)}, \dots, y^{(100)}$

$\left\{ \begin{array}{l} x^{(1)}, y^{(1)} \\ x^{(2)}, y^{(2)} \\ x^{(3)}, y^{(3)} \end{array} \right\}$

$N(0,1): y$
